

Our Clients.....

Serving the Industry

Our services are purchased by corporations, universities, insurance companies, architects, engineers, contractors, developers, building owners, property managers, legal firms and individuals. Below is what just a few of our clients and colleagues have to say about us.

"As Executive Director of the HEAT Center, I found The Architectural Alliance Group to be competent and responsive, with strong customer advocacy in all planning, design and construction phases. They became extremely accomplished in managing the inevitable surprises associated with the renovation of aged buildings. In all cases, change orders were minimized and budgets met as a result of AAGs' dedication to quality service."

Don E. Goodwin, Executive Director – Higher Education for Advanced Technology Center

"It has been my pleasure to have worked with The Architectural Alliance Group for the last several years. From a contractor's perspective, they have facilitated smooth projects starting with excellent drawings and specifications. Their "team" approach with all parties is a rarity in my experience."

Ed McBride, Owner – McBride Construction, Inc.

"It has been my experience that The Architectural Alliance Group exhibits quality professionalism. The diligence that the firm maintains with regard to the budget reflects their integrity and good judgment."

Mary Ann Roe, Ph.D. – Colorado Community College

"I find Mr. Logan and the staff of The Architectural Alliance Group as conscientious and dedicated Owner Representatives. They are definitely owner oriented and their knowledge and experience make our job of constructing easier."

Ken McKenzie, Project Manager – FCI Constructors, Inc.

"Our experience of Mr. Logan and his firm has been of a very high professional relationship. Mr. Logan has represented the Owner and has managed the funding in a very responsible way. His knowledge of the design and construction process has benefited the entire team in successfully completing projects. In addition, Mr. Logan is an expert on building codes. Not only does he know the current codes intimately, he has the understanding of the intent of the codes regarding the primary objectives of protecting the lives and safety of the users of the building."

Ronald K. Abo, AIA – Abo-Copeland Architecture, Inc.

"It has been my pleasure to work with The Architectural Alliance Group. AAG brings to the table knowledge and understanding. They have a way of asking the questions that will bring a building to a fine science."

Mike Rudden, Instructor – Red Rocks Community College

"Mr. Logan has provided an exceptional job of constantly seeking out solutions to design and construction situations that met the needs of the owner without alienating the design team or the contractor. However, both the design team as well as the contractor knew that Mr. Logan would not hesitate to challenge ideas. The words that come to mind in describing Mr. Logan as an Owner's Representative are tough but fair. Mr. Logan went above and

beyond when it came to reviewing design drawings and his extensive knowledge of building codes was an asset to the whole team.”

Brad Haswell, RA – Dauer-Haswell Architecture

“The Architectural Alliance Group has made many improvements in the design of all Primrose Schools in Colorado. I would recommend AAG as they are thoroughly familiar with various state and city requirements and their design will reduce the amount of maintenance required in high use facilities.”

Robert Tagliani, Owner – Primrose Schools
